

My Colourful Balloons

Educational game for the development of auditory perception

Promotional focus: sequence memory; for 1 - 4 players age 4 and up

Every player receives a game plan and two wooden discs (balloons) of every colour. The remaining balloons are placed in the centre. The cards are placed on the table in a covered stack. The game is played in turn or with a Game Master. The first player or game master takes the uppermost card from the stack and reads out the colours of the balloons from left to right. Then the players copy the heard sequence with their coloured wooden discs by placing them on their meadow in the plan from left to right. Whoever gets it right places a balloon on his/her game plan. The one who first has balloons hanging on all his/her strings has won. *Optional from 3 players with a competitive note: The fastest player wins the card.*
