

OBJECT OF THE GAME

Just One is a cooperative party game.
You all play together to get the best score!

Together, make one of the players – the active player – guess a Mystery word by secretly writing a clue on your easel.

Choose your clue without coordinating with each other and be original so as not to write the same clue as another player, as all identical clues will be canceled before the active player gets to see them.

At the end of the game, tally your score based on the number of Mystery words found.

SETUP

- 1) Shuffle the cards and randomly draw 13 to create a face-down deck in the middle of the table. Return the remaining cards to the box, they will not be used this game.
- 2) Give an easel and an erasable felt marker to each player.
- 3) Randomly choose a player to be the first active player.

CONTENTS

- 110 cards
- 7 easels
- 7 erasable felt markers
- This rulebook

GAME OVERVIEW

The game plays out in a succession of turns and ends when the deck of cards is empty.
Each turn is divided into 4 phases.

1 CHOOSE THE MYSTERY WORD

The active player draws the top card of the deck **without looking at it**, and places it on their easel so that all of the **other** players can see the words (one of the sides of the easel has a support to hold the card).

The player then chooses a **number between 1 and 5** to tell the other players which Mystery word they have to provide a clue for.

Note: If players don't know the chosen word, they can ask the active player to choose a different number.

2 CLUE SELECTION

Without communicating with each other and without showing it to anyone each player writes **one clue** on their easel. That clue must be composed of a **single word**.

*Note: a digit, a number, an acronym, an onomatopoeia, or a special character are all considered to be words.
Example: 007 is allowed to help someone guess Bond, just like Riiiiinnng or SMS are allowed to help someone guess Telephone, and \$ is allowed to help someone guess America.*

Invalid clues:

- The Mystery word but **written differently**.
Example: Shurt is not allowed when trying to make the player guess Shirt.
- The Mystery word written in a **foreign language**.
Example: Buisson is not allowed if the word to be guessed is Shrub.
- A word from the **same family** as the Mystery word.
Example: Princess is not allowed if the word to be guessed is Prince.
- An **invented word**.
Example: Swee'ing is not allowed to try to help someone guess Cake.
- A word **phonetically identical** to the Mystery word, but the **meaning of which is different**.
Example: Whether is not allowed to try to get someone to guess Weather.

3 COMPARING CLUES

Once all players have written their clues, the **active player closes their eyes**.

During this time, the other players turn their easels around and compare their clue with the other players. **All identical or invalid clues are cancelled**. To cancel a clue, simply tip the easel over to hide the clue.

Identical clues:

- **Two identical words**.
Example: Mouse and Mouse are identical.
- **Variants from the same word family**.
Example: Prince and Princess are considered to be identical.
- **Variants of the same word**: plurals, gender differentiations, and spelling mistakes don't count as actual differences.
Example: Prince and Princes, Actor and Actress, Philosophy and Filosofie are identical.

Note: If all clues have been cancelled, place the Mystery word's card back in the box and move directly to the End of turn phase.

4 GUESS

Once the identical or invalid clues have been cancelled, ask the **active player to open their eyes and try to guess** the Mystery word with the help of the remaining clues. To do this, they're allowed **ONLY ONE GUESS**.

RESULTS:

Success

If the active player **correctly guesses** the Mystery word: place this card **face up next to the deck**.

Failure

If the active player makes a **wrong guess**: return this card **AND the top card** of the deck to the game box.

Skip

If the active player chooses not to answer and **skips their turn**: return this card to the game box.

Notes:

- If the active player's guess has the **same pronunciation as the Mystery word**, that guess is considered to be **valid**.
- If the player gives a **wrong guess during the final turn**, also remove a card previously guessed successfully.

END OF TURN

The player to the left of the active player becomes the **new active player**. A new turn begins.

Note: make sure to properly erase your old clue between turns.

END OF THE GAME

The game ends when the deck is empty.

Count the number of successfully guessed cards and compare your total with this table to get your score:

SUCCESSFUL CARDS	SCORE
13	Perfect score! Can you do it again?
12	Incredible! Your friends must be impressed!
11	Awesome! That's a score worth celebrating!
9-10	Wow, not bad at all!
7-8	You're in the average. Can you do better?
4-6	That's a good start. Try again!
0-3	Try again, and again, and again.

VARIANT FOR 3 PLAYERS

With 3 players, the game plays out according to the standard rules as previous stated, with the exception of the following change:

During setup, players each take two easels. During the choice of clues, they write one clue on each of their easels. Each player therefore provides 2 clues instead of a single one.

Identical clues are also cancelled during the Comparison Phase of clue selection.
