

# **SERIOUS GAMING : REALITY OF A SIMULATED REALTY : THE GAME**

**This quartets game contains the content of the inauguration speech of Ivo Wenzler for the professorship of serious gaming at the NHL Stenden University.**

**The game consists of 63 cards. Three cards identify key questions regarding serious gaming [Q]. Each question is addressed by four definition cards [D]. Each definition is explained by four theme cards [T]. These 48 theme cards form the twelve quartets.**

**The game begins by placing the three question cards and the 12 definition cards on the table. The game then continues as any quartets game. Once a quartet is completed, the player can also pick up a corresponding definition card.**
