

Coloretto – Expansion Cards

Spiele aus Timbuktu

© Michael Schacht 2004

This expansion requires Coloretto, the award winning card game. The Coloretto expansion contains 10 additional cards, which give a surprising new twist to each game.

To use the expansion, cut the cards apart along the light gray lines. It's best to use a straight blade and a steel ruler.

Variant 1 – The Brown Extra Cards

Preparation : The 8 brown extra cards are shuffled and placed in a face down pile in the center of the table.

Play : The normal rules apply, with the following addition. Before each game an extra card is drawn and placed face up. The special rule specified on the card applies to the following game. After 4 games the player with most points wins. Note: Only the current card applies for the current game - previously drawn cards do not apply.

The cards in detail :

Eine karte zählt am schluss 3 punkte.

At the end of the game, all sets consisting of 1 card count 3 points (plus or minus). Note: Normally 1 card sets count 1 point.

Drei karten zählen am schluss 2 punkte.

At the end of the game, all sets consisting of 3 cards count 2 points (plus or minus). Note: Normally 3 card sets count 6 points.

Wer als 1. aussteigt muss eine karte vom stapel nehmen.

The first person in each round to take a stack from the middle of the table must draw a card from the face down pile and place it face up in front of him. The card drawn counts just as if it were taken from the center of the table.

Alle minuspunkte zählen am schluss dreifach.

At the end of the game, all negative points are multiplied by 3.

Zählt nicht als joker sondern am schluss -2 punkte.

At the end of the game, Jokers do not count as jokers, but as -2 point penalty cards.

Müssen bei erhalt an den rechten spieler abgegeben werden.

If a player takes a stack with one or more Joker cards, he must give them all to the player on his right.

Müssen bei erhalt an den linken spieler abgegeben werden.

If a player takes a stack with one or more +2 cards, he must give them all to the player on his left.

Nur zwei farben zählen am schluss pluspunkte.

At the end of the game, only two colors (instead of the usual three colors) count for positive points.

Variant 2 - The 2 green row cards

Preparation : The two new green row cards replace two of the regular brown row cards.

Example: With 3 players, use one brown row card from the base game, and the two green row cards from this expansion.

Play: The normal rules apply, with the following changes.

Two cards, maximum, may be played next to the green row card showing two cards on the illustration.

Four cards, maximum, may be played next to the green row card showing four cards on the illustration.

The regular brown row cards function as for the base game – i.e. three cards maximum.
